W. L. Rippon To Retire From Bank Service In December; Reside at Coast

First Came Here With Mr. Rippon in 1919; Entered Bank in September, 1905; Both Have Been Active Community Workers.

On Dec. 29 Coleman will lose two of its highly esteemed and most active community workers when Mr. and Mrs. W. L. Rippon will bid farewell to Coleman and travel to eastern Canada for a few months holiday and then return west where they will reside at the west coast, stopping in Coleman a few days enroute.

On Dec. 19 Mr. Rippon will retire on pension from the service of the Canadian Bank of Commerce in whose employ he has been during the past forty years, twenty-six of which have been spent in Coleman.

Mr Rippon entered the bank's employ in September, 1905, at Ayr, Ontario. In September, 1906, he came west. He gained promotion as the years passed and finally became a branch manager. He opened two small branches in the prairie before becoming bank manager at Taber. He was there three years before coming to Coleman where he managed this branch for the past twenty-six years.

While in Coleman both Mr. and Mrs. Rippon have been most active community workers.

He is a member of the Masonic lodge and in 1929 was Worshipful Master of Summit Lodge; He is a curler of many years and is considered one of Coleman's better skips. Two seasons ago he skipped his rink to the McGillivray Cup. He is a member of the Board of Managers of St. Paul's United church; for many years he was secretary of the Crown's Neat Golf and Country Club, and takes keen enjoyment in a game of golf.

During the war years he has been very active on Coleman's War Finance Committee and his efforts have been instrumental in putting Coleman "over the top" much sooner than would have been the case if he had not been active.

Mrs. Rippon has been a constant community worker and booster. She first started her community work by joining the Women's Institute which was quite active in the early 20's. She worked hard to raise funds for the swimming pool which the ladies planned to build and was on holiday in the east when the site was chosen across

the CPR tracks and alongside the river on which to construct the pool.

She has been a member of the Coleman Branch of the Canadian Red Cross and served when the organization was presided over by the late Mrs. Andrew McLeod. She has worked hard during the war years in the interest of the present Red Cross organization and is vice-president of the local branch. She has consistently helped the St. Paul's Missionary Society and St. Paul's Ladies Aid although she is not a member of either organization. For a number of years she and Mr. Rippon were members of Coleman tennis club, she being on the entertainment committee when Coleman took part in district tournaments. Recently she was appointed to the Entertainment committee of the Coleman Reception and Rehabilitation committee.

She has been a member of the Eastern Star for 20 years and has held various offices.

Mr. and Mrs. Rippon are known and esteemed by all classes of the community for their friendliness and democratic manner and their loss to the community will be keenly felt.

The new bank manager will be F. R. Duncanson, accountant at the Lethbridge branch of the Canadian Bank of Commerce, where he has been on the Lethbridge staff for the past seventeen years.

Mr. Duncanson started with the bank at New Westminster and during the first Great War went overseas with one of the siege batteries. He is a native of Scotland.

Advertising acts as a tonic to any head of business enterprise—

ICE MAKERS APPOINTED

Coleman Sports' Association received four applications for the positions of ice makers. Two were appointed, Mr. Charlie Raymon and Mr. Dave Sudworth.

Mr. Raymon was also one of the ice makers of last year. Both men have been busy the past week making ice and hope that skating will be in progress in a short time.

Polish Society To Seek Aid For The Homeland

Given a \$1,000 Quota by United Polish Relief Fund to Aid in Setting up Mobile Hospitals.

Alarmed at the high death rate at present prevalent in Poland due to diseases running rampant following the war, the Polish citizens of Canada have organized the United Polish Relief Fund, registered it under the War Charities Act, and have set up headquarters in Toronto. Purpose of the fund is to create revenue to set up mobile hospitals in Poland and thus help to fight against diseases.

On Nov. 2, J. Grocholski, president of the Polish Canadian Congress, visited Coleman and held a meeting here of Polish men and women in Coleman and Bellevue. He outlined the campaign's set-up and stated Coleman had been given a \$1,000 quota in the national campaign.

A committee has been organized locally and has the authority to solicit donations on behalf of the national committee during the campaign of Nov. 11 to Dec. 31.

Mike Opulski has been elected secretary and he has an advertisement appearing elsewhere in this issue seeking donations to the fund. Any member of the Polish Society will be only too pleased to give further details to individuals or groups interested in helping the fund.

EIGHTEEN RADIO OWNERS CAUGHT WITHOUT LICENSES

About three weeks ago a radio license inspector came quietly into town and made a house to house check-up of radio owners. As a result of his work eighteen citizens were summoned to appear in court for failure to have a radio license.

It is reported that thirty Blairmore citizens were summoned to appear in court at Blairmore.

ST. ANDREW'S CONCERT FRIDAY, NOV. 30

On Friday, Nov. 30, Coleman will do honor to St. Andrew, the patron saint of Scotland.

No effort has been spared to make the evening a success, and the committee in charge has succeeded in securing a number of talented artists for the program which consists of Scotch songs, dances, national music, etc.

Following the concert, old time and modern dancing will round out the evening's entertainment.

It is to be hoped that all interested in the pipe band, and in seeing it equipped as it ought to be, will give this event their support.

Program chairman will be J. J. McIntyre. Thanks is expressed to the following for their donations: Mrs. A. Morncy, \$5; Mrs. H. Dakers, \$5; Mr. R. Steurbaut, \$2.

TOYLAND AT COLEMAN HARDWARE

Will Dutil had a visit from Santa Claus this week and as a result of the visit Coleman Hardware is now a virtual toyland.

Toys of every description, dolls, games, sleighs, books, etc., are now on display and Will, invites the youngsters especially to visit the store and inspect the toys.

Seven Local Men Return Home On Queen Elizabeth

Seven Coleman men are listed as having arrived in Halifax on the Queen Elizabeth and are scheduled to arrive in Calgary on Saturday. Those now on their way home include:

Corporal McPherson. This man is unknown by the executive of the Canadian Legion and enquiry by The Journal failed to reveal his identity.

Sergeant Francis Mason, son of Mr. and Mrs. Wm. Mason, of Cardondale. Francis worked at one of

the local mines before enlisting in the army and has been overseas several years. He has seen action on the western front. Had the honor of being interviewed by a Canadian war correspondent during the tough fighting at Caen and having his remarks carried in Canadian papers.

Pte. Roy Beddington, son of Mr. and Mrs. Fred Beddington, of Lethbridge, and husband of the former Miss Iona Hulbert, who with their son is residing in Coleman. He first entered the army as a bandsman and was stationed at Red Deer for some time before going overseas. His unit went into action shortly after arrival and he received painful wounds.

CQMS Maurice Drew, son of Mr. and Mrs. Harry Drew. His parents and brother Jim will motor to the city early Sunday morning to meet him and accompany him home. A wire was received from him on Tuesday by his parents. He enlisted at the outbreak of war in September, 1939, and went overseas with the Calgary Highlanders in 1940. He was with the Highlanders when they landed in France and fought with them through France, Belgium, Holland and finally Germany. It was in May, 1940, that his parents last saw him.

Ptes. Frank and Henry Buckna, sons of Mr. and Mrs. Andrew Buckna. Went overseas during Christmas season, 1944. Have been in Belgium, Holland and Germany.

Pte. Nick Cytko, son of Mr. and Mrs. John Cytko. He enlisted in October, 1942, and went overseas in March, 1943. He saw action on the western front.

Tuberculosis was the cause of the rejection of approximately 15,000 men and women for military service in World War II. The fact they had the disease in one form or another was revealed by X-ray examinations.

Rev. George A. Kettys Passed Away Suddenly Sat. Afternoon

Sudden Passing Shocked and Surprised Community; Funeral Held on Tuesday Afternoon; Had Served With Red Cross in First Great War.

The sudden passing of the Rev. George A. Kettys, 61, minister of St. Paul's United church, on Saturday afternoon came as a complete surprise to the community and expressions of sorrow were to be heard from friends and acquaintances alike as the news quickly spread throughout town.

Unknown to his friends, Rev. Kettys had been feeling unwell for several months, but had refused to relax his duties. On Saturday morning he had confided to his youngest son that he felt unwell. That afternoon he quietly left his home and walked towards the hospital. He met the doctor at the hospital door and walked across the street with him to the surgery. The two men entered the surgery, the doctor walking into his consulting office to divest himself of coat and hat, when he heard someone shout "the preacher." He came out to find Rev. Kettys slumped in a chair, death coming moments later despite the doctor's every effort to revive him.

Born in Kent County he came west at an early age with his parents to East Edmonton and Leduc districts where the family pioneered.

He was a member of one of the first graduating classes at the University of Alberta, graduating with his Bachelor of Arts degree. On May 31, 1914, he was ordained to the Christian Ministry in the Alberta Conference of the Methodist Church at Calgary.

During the First Great War he served overseas for three years with an ambulance corps as a stretcher bearer and was wounded at the front. While in Scotland he met his future wife, Miss Katherine Ross, Edinburgh school teacher, they being married at Edinburgh.

burgh in July, 1919. They returned to Canada in September, 1919. At the age of 21 he volunteered as a candidate in the ministry and was given one or two assignments in southern Alberta.

Rev. Kettys was given church assignments at Beaver Lodge, in the Peace River country; Lake Saskatchewan, Chinook, Camrose and Clive. A year and a half ago he was called to St. Paul's United church, succeeding the Rev. J. E. Kirk.

Since coming to Coleman deceased has been very active in community affairs. He aided the Red Cross during the past year and a half, took part in Remembrance Day services, took an interest in the youth of the town, was a member of the Lions' club and also a member of Coleman Curling Club, a sport from which he appeared to derive a great deal of enjoyment. He was a member of Coleman Reception and Rehabilitation Committee, and took part in the "Welcome Home" banquet given returned men and women two weeks ago. He was also a member of the local branch of the Canadian Legion.

On Friday, the evening prior to his passing, he had called a meeting to clean up the business pertaining to the recent clothing drive, of which he was chairman. That same evening he had frolicked with a number of youths in the church club room.

Surviving are Mrs. Kettys; two daughters, Alva and Catherine, and two sons, Ross and Don. Also two sisters, Mrs. D. C. Walker, of Peace River, and Mrs. Arthur Burkholder, of Duncan, Vancouver Island.

The funeral was held from St. Paul's United church on Tuesday afternoon at 2 o'clock. A large number of friends attended the church service. Eight out-of-town ministers were present and took part in the service: Rev. H. P. Marston, of Magrath, was chairman; Rev. J. G. Goddard, of Pincher Creek, led in the opening prayer; Rev. W. J. Huston, of Macleod, read the Scriptures; Rev. J. L. Wright, of Vulcan, led in prayer; Mr. Rueben Johnson sang "Crossing the Bar"; Rev. W. H. Irwin, of Bellevue, gave the address; Rev. R. Magowan, of Lethbridge, gave the Benediction.

At the graveside Rev. J. McKelvey, of Blairmore, and Rev. H. A. Mutchmor, of Lethbridge, conducted a brief service.

Members of Coleman branch of the Canadian Legion conducted their service at the graveside, Rev. W. E. Brown, of St. Alban's, conducting.

Pallbearers included T. Holstead, Neil McKinnon, Fred Smith, W. L.

THIN STRONG PAPER - NONE FINER MADE

The Plight Of Europe

THE FLIGHT OF THE PEOPLE IN EUROPE, who face this winter with the prospect of being without adequate food, clothing, or fuel, is now arousing much interest and concern on this continent. It is most regrettable that those who endured the hardships of German occupation, and who saw parts of their land turned into battle grounds, must continue to suffer now that the war is over. Disruption of transportation facilities and the destruction of factory buildings and equipment have disorganized production and distribution of manufactured goods, while agriculture has been similarly affected, making the food shortage serious. Efforts of those members of the United Nations who are more fortunately situated, and of the U.N.R.R.A. organization to alleviate the situation, are hampered by transportation difficulties and by the problem created by the shifting population of some fifteen million displaced persons in Eastern Europe.

Warning Given By Mr. Bevin

In Canada and the United States, food rationing is continuing in order that supplies may be sent to Europe, and the people of Britain have undertaken a program of rationing even more stringent than that which was in force during the war, for the same purpose. In spite of these efforts, it is realized that conditions in Europe will be very bad in the months to come. Mr. Ernest Bevin, British Foreign Secretary, told the House of Commons recently that "hunger and privation may bring terrific loss to Europe, more devastating than guns, or even the atomic bomb." He also warned the British people that their future would be affected by conditions in Europe, and that warning could also be applied to the continent, for it is now clear that problems of individual countries must in the future be the problems of all nations, if we are to have stability and security in the world.

Clothing Drive Was Successful

The people of Canada are well aware of the situation in Europe and there has been general understanding of the need for co-operation in all efforts to improve conditions there. In the recent National Clothing drive which was undertaken to provide clothes for the men, women and children of liberated Europe, the objective of 10,000,000 pounds of garments was exceeded by many thousands of pounds. Of this, approximately four million pounds were contributed by the people of the Prairie Provinces, British Columbia and the Yukon Territories. This was a practical demonstration of the intentions of Canadians to assist in the difficult task of post-war rehabilitation, and it will no doubt do much towards building up friendship and good will between Canada and the liberated countries of Europe.

Never neglect head colds! They can cause much suffering. A little Vicks-Va-Tro-Nol on each nostril works fast right where trouble is to relieve misery, stuffy nostrils, head colds, soothes irritation, reduces swelling, makes breathing easier. Try it! Also helps prevent many colds from developing if used in time. Follow this simple plan in folder.

VICKS VA-TRO-NOL

May Mean Contracts

India In Market For Canadian Fishing Vessels With Refrigeration

D. N. Khandke of Bombay, India, said in an interview that Canadian shipbuilders and refrigerator plant manufacturers might soon be awarded contracts totalling more than \$50,000,000 by the government of India, provided they gave favorable quotations.

Mr. Khandke was commissioned by the government of India to study fisheries in Canada and the United States and to make recommendations for modernization of Indian fisheries.

He said his government might want about 1,000 fishing vessels, each about 65 to 80 feet long and equipped with refrigeration facilities. In addition, at least 100 ice-freezing plants for cold storage might be needed.

Java is the most densely populated island on earth.

SMILE AWHILE

"Do you like the men who are always trying to kiss you, or the other kind?"

"What other kind?"

Doctor: "You cough more easily this morning."

Patient: "I've been practising all night."

"How much are the oranges?"

"Thirteen cents each, lady."

"I'll take two, please."

"Givin' a party?"

Sergeant: (on the rifle range):

"And remember, the new bullet will penetrate two feet of solid wood, so remember to keep your 'eads down'."

Joe: "Say, what's the big idea—painting your car blue on one side and red on the other?"

Blow: "It's great stuff for winning an accident case. You should hear the witnesses contradict each other."

"Boy, what you doin'?"

"Writin' to my brother."

"How come you write so slow?"

"Cause my brother can't read fast."

"I've told you afore, I'll no 'ave ye whistlin' when you're workin'."

"I wasna. I was just whistlin'!" replied the office boy.

Wife: "What's the idea of pokin' the broom in the baby's face this mornin'?"

Husband: "I just wanted to get him used to kissin' his grandfather."

"You must be keen on the movies, old boy, to go twice a week."

"It's not that exactly. You see, if I don't go regularly, I can't understand what my grandchildren are saying."

He: "May I have the last dance with you?"

She: "You've just had it."

Buy War Savings Stamps regularly.

Meat Shipments

Increase For Overseas Has Been Steady Since Rationing Resumed. MONTREAL.—The Canadian meat board disclosed that Canada shipped, or cleared for shipment, 110,000,000 pounds of meat to Britain in October. Alfred Savoie, prices and supply representative in Montreal for the prices board, said that since resumption of meat rationing in Canada there has been a steady increase in shipments overseas of beef, bacon, canned meat, lamb and mutton. The Canadian meat board has also cleared or booked for clearance to Britain and Europe from Oct. 1 to date meat representing the productions of 451,000 hogs, 112,200 cattle, 100,000 lambs and 20,000 sheep.

Where The Blame Lies

Related Testimony Favors Cow That Caused Famous Chicago Fire

Mrs. O'Leary and her cow, the much-maligned pair who are said to have started the great Chicago fire in 1871, have at last received testimony in their favor.

An old-timer in Chicago, who himself as a child had to flee from the fire, declares that it was all caused by an oyster party given by a family named McLaughlin, who occupied the front part of the O'Leary home. With the guests clamoring for more stew and the milk running low, one of the party picked up a table lamp and went out to get assistance from the cow. The cow is said to have resisted the intrusion of a stranger at that unreasonable hour and to have kicked the lamp over.

It remains true that the fire started in Mrs. O'Leary's barn. But the lamp was not Mrs. O'Leary's lamp, and the kick given by Mrs. O'Leary's cow was caused by very considerable provocation. Truth will out, though it sometimes takes 74 years.—Montreal Gazette.

GEMS OF THOUGHT

GIFTS AND GIVING

The best thing to give to your enemy is forgiveness; to an opponent, tolerance; to a friend, your heart; to your child, a good example; to a father, deference; to your mother, conduct that will make her proud of you; to your neighbor, respect; to all men, charity.—Balfour.

What is called liberality is often merely the vanity of giving.—La Rochefoucauld.

Every good gift and every perfect gift is from above, and cometh down from the Father of lights, with whom is no variableness, neither shadow of turning.—James 1:17.

Certain occasions, considered either collectively or individually and observed properly, tend to give the activity of man infinite scope; but mere merry-making or needless gift-giving is not that in which human capacities find the most appropriate and proper exercise.—Mary Baker Eddy.

It is the will, and not the gift that makes the giver.—Lessing.

The heart of the giver makes the gift dear and precious.—Luther.

Answer To Last Week's Puzzle

Price Control And Rationing Information

Q—Our school would like to arrange for hot lunches at mid-day for the students. Will it be possible to receive rations for these lunches?

A—If the school teacher will contact the local ration board, and give in writing the number of pupils to whom lunch will be served and the number of days per month, rations will be allowed for the serving of these lunches.

Q—Will you kindly give me a list of unrationed meats?

A—Beef—whole head, brains, tail, tripe, liver, heart, kidney, tongue, sweetbread. Veal—whole head, brains, tail, tripe, liver, heart, kidney, tongue, sweetbread. Pork—Whole head (without jaw), brains, feet, spareribs (back ribs, side ribs, neck ribs and ribs), tail, liver, heart, kidney, tongue, Lamb—Whole head, brains, tail, fries, tripe, liver, heart, kidney, tongue, sweetbread.

Q—When I receive my discharge would it be advisable to go to my own local ration board for my ration book or should I go directly to the ration branch in the city where I will receive my discharge?

A—If discharged go to the local ration board in their home district, they will get the best possible service and will not have to queue up to obtain their ration books.

Q—When will a new ration book be issued?

A—No decision has yet been made regarding the issuance of another ration book. However, by using the spare coupons in the present book you can be made to last almost another year.

Please send your questions or your request for the pamphlets "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

WINNIEPEG MEMORIAL

A plan to erect a memorial centre dedicated to the men who fought and died for Canada in the Second Great War has been approved by the Winnipeg city council.

LIFE can Begin AFTER 40, IF.

Around 40 our energy lessens. But, experience has taught us to use our work without effort. The years ahead should yield the greatest accomplishments, the most enjoyment and happiness. They can, too, if we avoid the kidney and bladder diseases such as Backache, Headache, Rheumatic Pains, Lassitude, Loss of Sleep and Energy which so often attack after 40. For over half a century Dr. Dodd's Kidney Pills have been helping men and women to keep kidneys and bladder in good order. If you are nearing 40, or past it, for the sake of your health and a happier future use Dodd's Kidney Pills today! 25

The Quality Tea "SALUDA" TEA

MEET A CWAC—

There isn't much one can say in any language in the presence of Pte. Margaret Lacey, of Victoria, B.C., that she doesn't understand, as besides English she can speak Spanish, Italian, French and German. Born in Mexico City, Pte. Lacey has visited England, Germany, Holland, Belgium, Spain, Portugal and Cuba. Pte. Lacey joined the Canadian Women's Army Corps in Vancouver, May, 1945. She received her basic training at Kitchener, Ont., and then took a clerk's course at Edmonton. "Mexico city is a marvelous place for a holiday right now," Pte. Lacey said, "you see the high inflation rate is in the foreigner's favour at present, so one can make one's money go quite a long way. In pre-war times it was a most common place in which to live. Nearly every kind of food and wines could be bought there." Extreme temperatures during a day in the summer time are quite common, Pte. Lacey continued, "it is nothing to have it drop from 90 degrees at noon to 30 degrees in the evening."

Pte. Lacey is at present working in the District Education Office, Headquarters, Regina, Sask.

CAPTAIN MABEL FEARNLEY

POSTED TO CALGARY—

District Officer, Canadian Women's Army Corps, M.D. 12, Regina, Captain Mabel Fearnley has been posted to M.D. 13 Headquarters, Calgary. She will succeed Major M. Barker, District C.W.A.C. officer, who has been posted to Halifax. Captain Fearnley of Saskatoon, joined the C.W.A.C. in October, 1942, and came to Regina as assistant district C.W.A.C. officer in 1943. She was appointed District C.W.A.C. officer in July, 1944.

COLONEL EATON RETIRES—

National Defence Headquarters recently announced the retirement of Col. Margaret Eaton, O.B.E., Director General of the Canadian Women's Army Corps. Col. Eaton has held this appointment since April, 1941, previous to which she was Assistant Adjutant General at National Defence Headquarters. Earlier in the war she served as staff officer at Toronto and at Montreal. Col. Eaton is a daughter of Col. and Mrs. R. Y. Eaton, of Toronto. She attended Brookside Hall, Toronto, West Heath School in England and later the Sorbonne in Paris. Subsequently she studied in Germany and in Italy. For some years she was an executive on the Junior League in Toronto. In September, 1942, she accompanied Major General Jean Knox, Auxiliary Territorial Service, on her Canadian tour and later she was attached to the ATS in the United Kingdom, while overseas attending a senior officers' course. Col. Eaton was married to Lieut.-Col. J. H. Dunn, O.B.E., R.A.M.C., of London, England, on October 13, 1935, in Toronto.

Words Made Visible

New Form of Speech Not Very Difficult To Learn

A new form of language, where electronic tubes make spoken words visible in green light, has been announced by the Bell Telephone laboratories in New York.

The deaf can read this language. Persons of normal hearing learn to read it about as easily as they would learn a foreign language. The tubes also read this sound language on paper in permanent form.

The new alphabet looks somewhat like shorthand, but with all characters fat, and some a bit fuzzy on the edges. The electronic translator draw not only spoken words, but music, noise, dialects and bird songs. It can be made to record the emotions in a human voice.

WILL USE RADIO

FORT FRANCES.—The Junior Chamber of Commerce has decided to seek establishment of a life-saving two-way shortwave radio network in the isolated Rialty Lake region. Hub of the proposed network, which will be used to rescue persons lost or injured in the bush, will be Fort Frances.

From black coal tar are obtained over 8,000 kinds of dyes, many of bright color.

Cuba is the largest island of the West Indies.

Cannot Grow Poppies

Gen. MacArthur's Order May Stamp Out Japan's Narcotic Trade

Probably General Douglas MacArthur has political and economic advisers, but he has shown himself to be a sage military dictator, and he has obtained many wise and effective decrees against Japan. His latest order is that the Japs must stop growing poppies. General Chiang Kai-shek has given a similar order with regard to all the land the Japs sown to poppies in China.

The Chinese are notorious addicts to opium and other narcotics when they can get their hands on them, and since the accession of Kai-shek to power, he and his government did a tremendous job of suppressing the traffic. But when the Japanese invaded China they did everything they could to re-create the traffic, growing poppies and selling opium to the natives as cheaply as possible, even giving it away when the people were too poor to buy it, the purpose behind it all being to debauch the natives and make them the easier to govern.

Japan is the centre of the narcotics trade. If General MacArthur succeeds in stamping it out he will have achieved one of the greatest reforms in modern times, and accomplished in a short time more than the League of Nations did in more than 20 years of effort.—St. Thomas Times-Journal.

Good Way to Treat Sore, Itching Piles

If you suffer agonizing torture from sore, itching piles, this is an internal treatment which is simple home treatment with the promise of a reliable firm to refund the cost if you are not satisfied with the results.

Simply get a bottle of Hem-Roid from any drugstore. This is an internal treatment whose medication is directed to the removal of the cause of piles. Hem-Roid is a small tablet, easy and pleasant to use and pleasant results are quickly obtained. Swelling and soreness are relieved, pain subsides and as the treatment is continued the swelling and inflammation are reduced and the sore, painful pile tumors heal over, leaving the rectal membrane clean and healthy. Get a bottle of Hem-Roid today and see what a relief it is to rid yourself of this misery.

BRITISH CONTROLLER EXPECTS TO GET LOWER PRICES FOR THE PURCHASE OF FLAX IN CANADA

BELFAST, Northern Ireland. — John Ferrier, British flax controller, said in an address that fresh terms for the purchase of flax in Canada at lower prices would be negotiated for 1946.

"The prices which we have paid in Canada during the war have been some of the highest in any areas from which we have obtained flax," he said.

"In 1942 we increased the price of flax by no less than £50 (\$225) a ton and again by the same amount in 1943, in the hope that the proportion of flax to tow would increase, since Canada had before that produced about 60 per cent tow to 40 per cent flax. Unfortunately the exact reverse of what we anticipated occurred, and despite our much higher prices for flax than tow, Canada now is producing 70 per cent tow to 30 per cent flax.

"From Canada during the war we obtained 3,900 tons of flax and 10,610 tons of tow, totalling 14,510 tons. A substantial cut in Canadian flax prices in inevitable now that our agreement with the Dominion comes to an end and it may be that as a result some reduction in acreage will occur. We are under an obligation to buy the present 1945 crop but we will be negotiating fresh terms and conditions with Canada for 1946."

From Australia, wartime supplies totalled 5,770 tons of flax and 750 tons of tow, and from New Zealand, 4,680 tons of flax and 2,780 tons of tow.

Mr. Ferrier said that northern Ireland had played the most important part in the supply program with 97,000 tons of flax purchased during the war.

"During the wartime flax manufacturers were 20,000 miles of parachute webbing, 54,000,000 square yards of linen airplane fabric, 25,000,000 yards of heavy canvas tarpaulins and hat covers for the mercantile marine and 75,000,000 yards of linen dowlas and blitz covers used for innumerable purposes by various service and government departments.

CONDITIONS IN EUROPE

BOSTON. — Gen. Eisenhower said "there must be instant adoption of a system to return the boys home—but America's obligation to the world and to ourselves must be met. Are we going so far in weakening ourselves in Europe that we are going to abandon unfilled the purposes for which we fought or are we going to have the strength to see the job through?" he asked in a speech at a state dinner given by Gov. Maurice Tobin.

WOULD NOT SAIL

LONDON. — Four hundred Royal Australian and Royal New Zealand Air Force officers and warrant officers refused to sail for Australia aboard the Orient liner Orion because of what they termed "disgusting overcrowding."

LONDON'S POSITION AS A WORLD NEWS CENTRE IS SAID TO BE INCREASINGLY CHALLENGED

LONDON. — World's Press News in an editorial in its latest issue said it viewed "with disquiet" the government proposal to nationalize telecommunications linking Empire and commonwealth countries.

The newspaper Trade Weekly said it was not concerned with the merits of government control versus private enterprise.

"All that we on behalf of the press are concerned with is the greatest possible efficiency on which London's position as a world news centre depends," it added.

"The British Empire cable chain is being increasingly challenged these days by America. Her cables are privately owned and are keyed up to the highest speed in service. Much trans-Atlantic traffic is carried by them. They want more—and more all over the world."

"The acid test we impose on the proposed deal therefore is: Will it improve the British Empire's capacity to serve high-speed cable needs in press and commercial traffic? On the general front shown by government in commerce we doubt it."

"Cables and Wireless" record is good. Its skilled staffs are well paid. They share in profits and enjoy good pensions. They are on their toes to serve. More, the company has shown itself more responsive to criticism and rectification of ills than any government department we know.

"Cable and Wireless, Limited, operates most of the telecommunications linking different parts of the British Empire."

Buy War Savings Stamps regularly.

Canadians To Try High Nazi

MAJ. GEN. HARRY FOSTER

COL. PETER WRIGHT

The first Canadian war crimes trial is expected to open Nov. 28 in the naval barracks at Aurich, near Emden, in the Canadian occupation zone area in northwest Germany. The criminal is Major-General Kurt Meyer, former commander of the German 12th S.S. Hitler Youth division, who has been indicted for acts involving the shooting by his men of 48 Canadian prisoners-of-war in the Caen area during the battle of Normandy. His trial will be heard by a special Canadian military court headed by Major-General Harry Foster, former commander of the 1st Canadian division. Col. Peter Wright, O.B.E., of York Mills, Ont., has been detailed to act as Meyer's defence counsel. Other Canadian trials of Nazis are expected to follow.

DEBT TO CANADA

British Chancellor Of The Exchequer Praises Dominion

LONDON. — Britain's indebtedness to Canada is \$561,000,000 plus some claims arising out of the war which have not yet been determined, Hugh Dalton, chancellor of the exchequer, told the House of Commons.

"I think it is widely known that the Canadian government has behaved with the most splendid generosity, shedding not only blood but giving great treasure to the common cause," he said.

His statement came in answer to a question from Col. F. J. Errol, Conservative, of Ayr, Scotland, who also asked the indebtedness of Britain to France.

Mr. Dalton said indebtedness to France was "nil."

PRESS CONFERENCE

International Meeting To Be Held In Australia Next Fall

SYDNEY, Australia. — An international press conference attended by representatives of Canadian, British, United States and Australian newspapers will be held in Australia in September and October of 1946, R. A. Henderson, president of the annual conference of the Sydney Newspaper Proprietors' Association, announced.

Mr. Henderson said the conference will be held to defend the liberty of the press "which is more severely threatened than at any time in modern history."

LAKE FLEETS

Carriers Are Ready To Carry Away Big Wheat Shipments

PORT WILLIAM. — A fleet of 30 lake carriers, representing 250,000 net tons of shipping, steamed into lakehead harbors over the weekend after weathering a blustery fall storm.

The ships will carry away approximately 8,000,000 bushels of grain as soon as elevators can fill their holds. Total capacity of the fleet is estimated at 8,500,000 bushels of wheat.

WILL HELP SOME

LONDON. — Sir Ben Smith, minister of food, said tonight-rationed Britons would get a "Christmas gift" in the form of larger food allotments in late December. The "bonus" will consist of a pound of sugar, sixpence (12 cents) worth of meat, fourpence (eight cents) worth of corned beef, a quarter of a pound of candy and a double ration of butter and margarine.

NEW USE FOR SUB

RANGOON. — The Burma government is seeking a submarine, with a view to solving the present shortage of electricity. A submarine, it said, could generate current for a large section of Rangoon.

BY END OF YEAR

709 Veterans Land Act Houses Will Likely Be Finished

OTTAWA. — Only 709 of the 2,719 houses presently being erected across Canada under the Veterans' Land Act will be completed by Dec. 31, Gordon Murchison, director of soldier settlement, told parliament's special committee on veteran affairs.

Shortage of experienced labor and difficulty in obtaining the necessary building materials were two reasons why more dwellings could not be finished this year, he said.

All 2,719 houses included in the 1945 veterans' building program would be ready by May 31, 1946. By February 15, 834 of the houses would be completed; 710 by March 31 and the remaining 465 by May 31.

FARBEN PLANT DESTROYED

EEBENHAUSEN, Germany. — The \$70,000,000 I. G. Farben-controlled nitrocellulose plant which fed the German war machine five per cent of up at the Allies continued their demolition of Germany's war industries. It was disclosed in a motion picture tabled in the House by Defence Minister Abbott.

AWAITING TRIAL—Tokyo Rose, the Los Angeles-born Japanese girl, Iva Toguri, who nightly broadcast Jap propaganda to the U.S. troops, is held in Yokohama awaiting trial for treason.

COMMANDS COL. MUNIST FORCES IN MANCHURIA—Chinese Communists fighting central government forces have plunged within 100 miles of Shanghai. Gen. Chu Teh, here, has charge of the Communist forces in Manchuria.

AWARDS GIVEN

Investiture At Buckingham Palace Honors Twenty-Two Canadians

LONDON. — Twenty-two Canadians received awards from the King at a Buckingham Palace investiture which included honors to two of the few men who have seen an atomic bomb explode.

Canadian awards included D.S.C.'s to Lt.-Col. Gordon Minto Churchill, Winnipeg, former officer commanding the 1st Canadian Armored Carrier Regiment and now dean of faculty at Khaki university, and to Lt.-Col. Ernest George Johnson, Toronto, who also received the O.B.E.

The King knighted Prof. James Chadwick, British scientist who headed the British atomic research group in the United States and saw the experimental bomb burst in New Mexico.

Later, the King chatted with Group Capt. Geoffrey Cheshire, R.A.F., who flew as an observer with the American crew which dropped the atomic bomb on Nagasaki and who received the Victoria Cross for 100 bombing missions during four years of fighting, as well as a second bar to his D.S.O.

GOAT VALUABLE DATA

MOSCOW. — M. A. Titlov, Soviet polar pilot, has returned to Moscow after a 12,000-mile plane flight into the Arctic which carried him within a few hundred miles of the north pole. Titlov, flying a two-engine plane, brought back data on ice drifts expected to prove of value on northern shipping routes.

WOULD SHARE SECRETS OF THE ATOMIC BOMB UNDER SOME EFFECTIVE SAFEGUARDS

WASHINGTON. — President Truman and Prime Ministers Attlee and Macdonald King offered the infant United Nations organization the task of organizing the world for the safe use of atomic energy.

The leaders of the United States, United Kingdom and Canadian governments, whose countries developed in the atomic bomb the most devastating force ever known, announced their willingness to share their secrets with countries willing to reciprocate and undertake not to use the force for destructive purposes.

The announcement was in the form of a joint statement signed by all three and read by President Truman at a White House press conference.

Mr. Attlee and Mr. King sitting on his right and left, and with congressional leaders present. They proposed that the United Nations organization set up a commission which would arrange the mutual undertakings necessary to permit atomic secrets to be revealed in safety to its members.

At the same time, they declared that the three countries, which alone possess the knowledge of atomic bomb manufacture, would not share that knowledge until "it is possible to devise effective, reciprocal and enforceable safeguards acceptable to all nations."

Issue of the joint communique closed the three leaders' talks on atomic energy.

The commission which the three leaders proposed at the conclusion of their six-day conference of atomic problems would be charged with the duty to make specific proposals on these four points:

"1. For extending between all nations the exchange of basic scientific information (on all subjects) for peaceful ends.

"2. For control of atomic energy to the extent necessary to ensure its use only for peaceful purposes.

"3. For the elimination from national armaments of atomic weapons and of all other weapons adaptable to mass destruction.

"4. For effective safeguards by way of inspection and other means to protect complying states against the hazards of violations and evasions."

The three chiefs of state prefaced their proposals by saying flatly: "We are aware that the only complete protection for the civilized world from the destructive use of scientific knowledge lies in the prevention of war."

"No system of safeguards that can be devised will of itself provide an effective guarantee against production of atomic weapons by a nation bent on aggression.

"Nor can we ignore the possibility of the development of other weapons, or of new methods of warfare, which may constitute as great a threat to civilization as the military use of atomic energy."

"The statement made a distinction between what was called the 'fundamental scientific information' about physics."

"LARGER PARCELS

OTTAWA. — Postmaster-general Bertrand announced in the commons that British postal authorities have agreed to accept parcels weighing up to 11 pounds for delivery to civilians in Britain. The present limit is five pounds.

"And To France

SOREL, Que. — A hundred French-Canadian sailors are crossing the Atlantic on an unusual and somewhat hazardous voyage, from this St. Lawrence river port to Nazare, France. They are navigating two tugs and four dredges, which are being towed to France.

The sailors will probably make one of the shortest Atlantic crossings known to modern seafaring history.

The tugs and dredges were sold by Marine Industries, Ltd., to the French government.

"SECOND ESTIMATES OF GRAIN CROP FOUND TO BE GENERALLY DOWN, ACCORDING TO REPORTS

OTTAWA. — Canada's 1945 wheat acre compared with 101 per cent, in production was placed at 308,600,000 1944.

LIVERPOOL. — A steadily worsening supply situation in all wheat-exporting countries except the United States was seen by the trade publication, Corn Trade News.

The newspaper said Canada may be unable to maintain her exports of wheat and flour to Britain on last year's scale. It added that while the Dominion may export almost as much as last season, many more countries will be competing for her wheat and flour.

The article added that prospects of substantial help from either Argentina or Australia are much less bright than they were some months ago. Both report heavy domestic requirements and prior claims of neighboring countries which are likely to leave little for export to Europe.

The article continued:

"United States exports will almost certainly exceed 300,000,000 bushels with an abundant wheat supply, big corn and record oats crop but due to the situation in Argentina and Australia, the burden of meeting the world's essential needs will fall more heavily than ever before on North America, the paper said.

"PLANE NOT THEIRS

WASHINGTON. — A British official said a C-54 transport plane furnished Winston Churchill by the United States when he was prime minister had been turned back "it is not our plane," said the official who asked to be anonymous. Its purpose has been served, he indicated, and it should be returned.

New Organization to Boost For Better Provincial Highways

Representatives of the Alberta Motor Association, the Alberta Motor Transport Association, and the Tourist and Good Roads Committee of the Calgary Board of Trade, held a meeting in the Palisier hotel, Calgary, to discuss the state and condition of the highways of the province. The purpose of the meeting was to form a co-ordinating committee of the three organizations, with power to add to its membership all other bodies interested, to impress upon the provincial government the fact that the tourist trade of the Dominion will be in full swing in 1946, and that Alberta must be in a position to greet the tourists with decent roads to travel over.

Present at the meeting were H. R. Chauncey, James Cleave, A. E. Wilson, A. B. Cowan and Les Saint, representing the Alberta Motor Association, with C. H. Grant and Alfred Blythe, of Edmonton, and G. C. Paterson, of Lethbridge. The Alberta Motor Transport Association was represented by Jack Taylor and Cris. Mikkelsen, and the Calgary Board of Trade Tourist Committee by M. A. Millard, K.C. and Reg. G. Smith. Mr. Chauncey was chairman of the meeting and Mr. Saint secretary.

It was reported by Mr. Chauncey that in correspondence with other provinces in the Dominion, most of the road construction was undertaken by private contractors after tenders had been called, and not by the provincial government road building departments. The need of Dominion and provincial joint action in the construction of permanent trans-Canada, interprovincial and provincial highways was stressed, but each province had its definite obligation to construct and maintain permanent highways and market roads within its own boundary.

Committees were appointed to interview other organizations, such as the Alberta Farmers' Union, the Alberta Wheat Pool, United Farmers of Alberta, boards of trade, Union of Alberta School Trustees and Union of Alberta Municipalities, placing before them the value of tourist traffic as a revenue producer in the province, the value of permanent highways and market roads, and urging their support. Messrs. C. H. Grant and Alfred Blythe, of Edmonton, will interview organizations in the northern part of the province, and Messrs. Chauncey and Smith for the southern part of the province.

It was pointed out that, with private contractors working on permanent highways, taking seven months as a construction season, only three miles per month of permanent concrete roads could be constructed per unit working, therefore, there were many years work ahead in giving Alberta what it should have had long ago—permanent, dustless, all-weather highways.

After considerable discussion, the meeting decided that there was a need of a co-ordinating body and a new organization was formed, to be known as the Alberta Highway Association, with Mr. Chauncey as chairman and Mr. Saint, of Calgary, as secretary.

U. S. VERSUS CANADIAN TAXES

Personal income tax cuts in the new U.S. tax bill have to be translated into percentages for easy comparison with Canada's flat 16% reduction in all personal income taxes. Expressing new U.S. tax rates first as a percentage of old rates, then as a percentage of income, a Financial Post Survey reveals that:

U.S. reductions are greater than Canadian in the lower income brackets;

Marriage and dependents bring even greater relief, percentage-wise, than in Canada;

Americans earning over \$10,000 don't get as good a break as the 16% cut for Canadians in the same income bracket;

U.S. taxes are still heavier than

Canadian in some of the lower income brackets, substantially lighter than Canadians in middle and higher groups.

One qualification to the comparison is that some states still levy income taxes. For these states the comparisons would not apply.

SELECT COLOR STYLE FOR LICENSE PLATES

Alberta license plates for cars in the license period which opens April 1 will have a changed color combination, according to information received by the Alberta Motor Association.

The colors will be black numerals on an orange background. This color combination is distinctive and has been found to give satisfactory results when used in several of the states.

The 1946-47 number plates will be made available as early as possible in March, following the practice in recent years.

Orders for 100,000 new plates were placed some time ago by the provincial secretary's department and these are expected to be delivered early in the new year.

A single plate will be used on cars in the new year, following the system operating during his current license period.

ADVERTISING FOR A JOB IS NOW PERMITTED

Job-hunters are now free to offer their services and outline their qualifications by advertising in whatever newspaper they desire, it was recently announced in a circular letter issued by the Department of Labor.

In this connection it was further explained that interested employers may now communicate with a prospective employee by means of a box number, or in any other manner preferred by the advertiser, instead of channeling their requests through the nearest local employment office, as the civilian manpower obliged them to do in the past. No contacts need be made by such employers with government officials. They may answer advertisements, arrange interviews and even hire a man if he seems satisfactory, entirely on their own initiative.

There is only one remaining condition, and that applies to the advertiser. He must still obtain a permit, it was stated, before taking a job.

UNEMPLOYMENT INSURANCE

A warning that judges were taking a serious view of cases of obtaining unemployment insurance benefit by misrepresentation was made Tuesday by Fred J. White, regional superintendent, UIC, Winnipeg.

In the prairie region during a 12-month period ending Sept. 30, there were 48 cases of apparent fraudulent claims reported to Ottawa, he said. There were 14 cases in October alone, and of the total 62 cases, 10 persons were prosecuted and sentenced to jail terms.

The majority of the offences were making false statements and receiving unemployment insurance compensation during days when the applicants were actually in employment.

"In cases where evidence of fraudulent intent is inconclusive, instructions are given to collect the overpayment either by cash or through the applicant's renewal claims. The Unemployment Insurance Commission Act is very severe, however, in respect to deliberate infractions, and leaves no option between a jail sentence and a fine. The Unemployment Insurance fund is set up to provide financial assistance to workers who, through no fault of their own, are thrown out of employment, and it must be protected against what is tantamount to theft by unscrupulous persons," Mr. White explained.

LABOR EXIT PERMITS

Persons intending to proceed to Europe, including the British Isles, may now secure labor exit permits freely and promptly upon application to the nearest national employment office.

This marks a further progressive step toward the restoration of normal, peace-time travel, and reflects the determination of the department of labor to remove all controls necessitated by the war as soon as it is in our national interest to do so.

Arrangements have been made with the ministry of transport for the United Kingdom so that persons not requiring labor exit permits will be cleared by the port authorities without the necessity of their having exemption certificates.

IMPORTANCE OF PLANTING TREES IN ALBERTA

The forestry division of the department of lands and mines again emphasize the importance of planting trees for shelter belts, windbreaks and woodlots in Alberta and their value.

Since the spring of 1932 many hundreds of thousands of trees have been distributed throughout the province for these purposes by the Alberta forest service and many agricultural areas have been benefited by this policy.

The results are becoming increasingly gratifying as the trees distributed several years ago are now affording protection against soil drifting, the high winds that are prevalent on the prairies and also in improving living conditions and beautifying the home surroundings.

Woodlots planted on marginal and sub-marginal parts of the farm are proving very beneficial in providing part, and in some cases all, of the farm requirements for fuel, as well as of the lumber required from time to time on the farm.

A great many bur and red oak trees have been distributed by the Alberta forest service in past years, and these species have proven hardy in a great part of the province.

A large number of bur and red oak are available for distribution in the spring of 1946 and it is suggested by the forest service that each applicant include a number of these in their applications.

Trees free of charge, the recipient paying the express charges covering shipment, are to be given by the forest service to farmers in the province for the following purposes:

(1) For planting within natural poplar or willow bluffs.
(2) For replacements in established windbreaks or shelter belts.
(3) For rural schools, churches and cemeteries.

Trees are not available for beautification only, nor for the establishment of new windbreaks and shelter belts. Persons requiring trees for the former purpose should secure them from commercial nurseries, and for the latter application should be made to the Dominion department of agriculture, tree division, Indian Head, Sask.

Trees available for distribution in the spring of 1946 include the following: White spruce, lodgepole pine, Scotch pine, Douglas fir, bur oak, red oak, green ash, American elm.

In addition to the above cuttings of laurel leaf willow, golden willow and northwest poplar will be available.

All applications must be filed in and received in the office of the Director of Forestry, Administration Building, Edmonton, before Jan. 31, 1946, otherwise they will not be given consideration.

Theatre Notes

BUCCANEERS KIDDED IN GOLDWYN COMEDY-HIT

Yo-ho-ho and a bucket of laughs! The pirate days of the Caribbean when Teach and Bluebeard and Henry Morgan scoured the seas, are hilariously ribbed by Hop Hope and a brilliant cast in "The Princess and the Pirate," latest Samuel Goldwyn technicolor production.

Hope has his most side-splitting role to date as a boastful but timorous actor who, while on his way to the West Indies, is captured by a fearsome buccaneer, The Hook, along with a runaway English princess. The perilous escapes of the pair from the pirate chief and, later, from a French prison ashore, point the action. Hope's frantic disguises to avoid the wrath of his antagonists keep the laughs coming thick and fast, and also contribute to the many thrills of the sparkling film, which pokes endless fun at the so-called glamor of the buccaneer era.

Virginia Mayo, Goldwyn's new feminine discovery, has her first important role as the princess, and Walter Slezak, Walter Brennan, Victor McLaglen, Hugo Haas and Marc Lawrence are featured. The RKO Radio release, said to be one of the year's funniest, was directed by David Butler.

This film will play the Palace this Saturday and Monday.

The first Christmas Seal sale was held in Denmark in 1904, the idea of Einar Holboell, a postal clerk.

T.B. Questions And Answers

Q. What are the dangers of primary infection?

A. First or primary infection is usually recovered from without marked disturbance of health. Many react to the tuberculin test without evidence of abnormal change. The danger is that the infection may go on to serious disease. It is a "yellow" or "warning" light.

Q. What are the dangers of reinfection?

A. Reinfection is usually follow-

ed by disease in the lung, which assumes somewhat the character of pneumonia or broncho-pneumonia. This is commonly called the adult type of disease, which may lead to chronic ill health, cavities in the lung, etc.

Q. Would an arrested case of TB become reinfected if in close contact with an active case?

A. While the presence of a recently healed lesion gives the patient some resistance, reinfection may occur.

Hockey Notes

(Isobel Ewing)

This year the Crow league will be comprised of intermediate hockey teams from Coleman, Blairmore, Bellevue and Pincher Creek. J. V. McDougall, of Blairmore, is president and Alrik Tibery, also of Blairmore, is secretary. Coleman's entry, sponsored by the Grand Union hotel, will be known as Coleman Grands.

Johnny Rypien, playing for Edmonton Canadians, has scored five points in two league matches. To date Ryp. has averaged two points or better in exhibition and league matches. Johnny has apparently hit the stride that made him a local hockey favorite.

With ice-makers Dave Sudworth and Charlie Rayman on the job, local skaters and hockey players are looking to the opening of the open air rink and the arena.

The Coleman Intermediate Hockey Club is sponsoring a dance to be held in the Community hall on Friday, Nov. 23. Advance ticket sales indicate a capacity crowd will be in attendance.

Pee wee, midget and juvenile hockey players are requested to hand in their names to Bill Gate at the Red and White store.

With Bill Fraser as coach the local juveniles are looking forward to a successful season. With Bellevue also icing a strong team interest in the Pass will be higher than ever before, and hockey fans are assured of better competition than has been provided during the past few years.

Local skiers are taking advantage of the present weather and are enjoying skiing. Reports state the Blairmore run is in excellent condition and several members from Coleman in the C.N.P. Ski Club were active skiers during the last week end.

THREE MORE TO ARRIVE AT ESQUIMALT NEXT TUESDAY

Three additional Coleman men are expected to arrive home the first week in December when W. Balloch, Doug. Jenkins and Tony Coccolone arrive at Esquimalt on the HMCS Ontario which is scheduled to dock at the west coast port on Tuesday, Nov. 27.

LIVETT TO ENGLAND

Robert Livett, of Calgary, president of District 18, United Mine Workers of America, left over the week end for London, England, to attend a conference of the International Labor Organization. Eleven nations will send delegates, representing government, employers and unions. Major item on the agenda will be a study of international labor problems with the hope of developing methods to eliminate friction between nations.

PARCEL POST TO GREAT BRITAIN

Limit of weight for gift parcels, 11 pounds. If food is included in parcel, food must not exceed 7 pounds in weight and only 2 pounds of any one foodstuff. One parcel per month. Parcels must have Customs Declaration attached before mailing.

FRED WEIR TO OPEN GIFT SHOP

Renovation has been made to the premises next to the Rite Spot by Fred Weir and he hopes to open a Gift Shop on Saturday next. Stock will include stationery, pen and pencil sets, dry goods, picture frames, etc.

The Churches

St. Paul's United Church
Sunday, Nov. 25
11 a.m. Morning Service
12:15 p.m. Sunday School
There will be no evening service.

ST. ALBAN'S CHURCH
Rev. W. E. Brown, Rector
Daily offices:
Mornings 9 a.m. Evensong 7:30 p.m.
Friday: Choir practice 8 p.m.
The Sunday next before Advent:
Holy communion 8 a.m.
Mornings and Litany 11 a.m.
Young people's service 2 p.m.
Altar flowers November 11 given in loving memory of Edith Mary Graham by Mrs. Frank Graham. Also in loving memory of Dulcie

Richards by Mrs. J. C. Richards.
St. Alban's congregation extend to Mrs. G. A. Kettys and family, also to St. Paul's congregation, profound sympathy on the sudden passing of their pastor.

Q. What is the tuberculin reaction?

A. When tubercle bacilli infect the body, the body becomes sensitive to the products of the bacilli, called tuberculin. When small amounts are put on, or into the skin, an inflammation sets in with redness or swelling. This occurs only in those infected when small doses are used, and when it occurs it is called a tuberculin reaction.

Q. If you have a positive tuberculin reaction, does it mean you have TB?

A. Not at all. It means only that at some time you have been exposed to the germs, and have them in your body. A reaction, however, suggests that an X-ray should be taken to determine whether or not any disease is present. Relatively few people develop tuberculosis compared with the number infected.

Two out of every thousand apparently healthy people in the average community are likely to be suffering from tuberculosis. The best way to find these people is through an X-ray survey. Your purchase of Christmas Seals will help provide money to finance these surveys.

The earlier a case of tuberculosis is discovered, the greater are the patient's chances of recovery. Early diagnosis is made possible through the sale of Christmas Seals which are used to finance X-ray surveys.

The 50th anniversary of the discovery of the X-ray is being observed this year. The X-ray was discovered by Wilhelm Konrad Roentgen Nov. 8, 1895. It is now universally used in the diagnosis of tuberculosis.

Discovered 50 years ago, the X-ray came into general use in the diagnosis of tuberculosis following World War I. Chest X-rays were part of the regular physical pre-induction examination of men and women in the services in World War II.

Due to modern improvements in equipment, experienced technicians can take 100 or more X-ray pictures in an hour. Miniature 35 mm., 70 mm., or 4"x5" films are usually used in X-raying large groups.

BREWING INDUSTRY OF ALBERTA

"Well, Bob has finally decided! When he's finished school he wants to go to work in a bank. And I'm glad—for a lot of reasons..."

He'll get a thorough training, and can even receive university instruction in banking and economics while he is working. Banking isn't learned in a day, but he'll get lots of help—and every opportunity to move up as he proves himself. The road to the top is wide open, and offers:

SECURITY AND PEACE OF MIND

Social security is a phrase prominent in public discussions these days, but the practice of it is not new. Consider the banks and their employees:

1. Pension Funds, to which, with their employees, banks themselves contribute substantially, make it possible for employees to devote all their business lives to banking, sure of an income for life when they reach the age of retirement.
2. Annual vacations with pay.
3. Ordinary sick leave with pay, and special sick leave arrangements in special cases.
4. Group life insurance contributed to jointly by banks and employees.
5. Good working conditions.
6. Unlimited opportunity for enterprise and advancement.

Banks and their staffs, in co-operation with each other, have made it possible for the latter to enjoy a well-founded sense of permanency and security.

WORLD HAPPENINGS BRIEFLY TOLD

Development of a prosperous and thriving trade between Canada and India within a year has been predicted.

By means of his own carrier pigeon service, Private C. E. Hickin, stationed in Middlesex, informs his wife when he is coming home on leave.

Men long associated with the late Franklin D. Roosevelt have established a foundation at Washington dedicated to the perpetuation of his ideals.

D. J. Lipson, independent member of Parliament, submitted to the British government a request that Generalissimo Stalin be invited to Britain in the near future.

The R.A.F. evacuated by air 300,000 sick and wounded throughout the world last year. Between D-day and E-day 82,000 were ferried to the United Kingdom.

Col. Charles M. Rutan, Prices Board administrator of bread and bakery products, said bakery industry controls will not be changed until at least the end of the winter.

The right to march through the streets of Winchester on all ceremonial occasions, with colors flying, drums beating, and bayonets fixed, has been granted to the Hampshire Regiment.

The Swiss radio announced the appointment of Dr. Victor Neef as envoy extraordinary to Canada for Switzerland. Dr. Neef was formerly attached to the Swiss embassy in New York City.

The probability of finding jobs for women in Canada is not likely to reach a maximum in the post-war period of more than 125,000 to 150,000 placements, Dr. Charlotte Whitton, of Ottawa, said in an address at Toronto.

SUNDAY SCHOOL LESSON

NOVEMBER 25

CHRISTIANS WORKING TOGETHER IN THE COMMUNITY

Memory Selection: We are God's fellow-workers, 1 Corinthians 3:9. Lesson: Matthew 25:37-40; John 17: Acts 15:1-18; Philippians 2:12-18. Devotional Reading: Matthew 5:3-16.

The text explained With Comments Our Lord's Prayer for the Unity of All Believers, John 17:20-23.

"Twice in the night in which he was betrayed, As evening dawned in mysterious gloom, The Son of God his intercession made, As in a threefold earnest prayer he prayed For them and all the ages 'yet to come'."

The seventeenth chapter of John contains Jesus' great intercessory prayer for himself, his disciples, and the world. For himself he prays that he may glorify the Father and thus give eternal life to his followers. For his disciples his prayer is that they may be kept in the name of the Father, that they may become one as the Father and he are one; and that they may be kept from evil. And then he prays not only for his own disciples but for all who should believe on him through his disciples' word. He prays that they may all be one. "This unity is infinitely more than mere unanimity since it rests upon unity and life—a unity that will result in the universal belief in Christ's mission. While he asked for this for the believers' sake that they might know a love which otherwise they never could know, and see a glory which would otherwise be hidden from them, he asked for it much more for the world's sake. Only a unity of discipline—the unity of the Father and the Son and grounded in it could give the gospel convincing power. When men see Christians really united one with another, as God and Christ are one, and loving one another with the love that reigns in God, they will be convinced of the mission and character of the Saviour. Wonderfully rich and tender is our Lord's thought about us: for it was for us that he prayed as he closed his prayer" (Robert E. Speer).

Bricks From Rubble

New Process Has Been Invented By German Engineer

Eugen Berck, German engineer, has invented a process for transforming rubble into bricks and building blocks which promises to shorten the clearing of ruins and the rebuilding of German cities.

Berck's process is based on a vibration method and the mobile machine employed makes it unnecessary to haul away debris. Rubble material 10 per cent. cement and a small quantity of water are placed in small casts in the machine and current is applied.

The bricks are removed from the casts 24 hours later but a further period of 28 days is required before the chemical process is complete and the bricks are ready for use. Berck's engineering associates said the completed bricks were harder than kiln bricks.

More than 250 pounds of roses are needed to make an ounce of attar of roses.

Most Popular Currency

British Sovereign Brings Fabulous Price On France's Black Market

A Canadian correspondent in Paris reports that there is a tremendous black market in foreign currencies. It may be disconcerting to American pride to know that the most sought-of currency is not the mighty dollar but the British gold sovereign. The latter would be worth \$4.87 at par value, but it brings \$115 in the black market, or 5,000 francs in French money. The reason that such a price is offered for the sovereign is that it is regarded as the safest in which to invest black market profits.

The sovereign was first minted during the reign of Henry VII, and was in common use in the British Isles until the outbreak of the First World War. Up until that time all wage earners were paid weekly in sovereigns and half-sovereigns, except perhaps in Scotland where the banks issued one-pound notes, whereas in England the smallest denomination of "folding money" was the Bank of England 5s note, which was equivalent to approximately \$25. The bulk of retail merchandising across the counters was done in gold and silver. Men carried their gold coins in a "sovereign purse" carried on the end of their watch chains. When the war came the Government called in all gold coins and they disappeared from circulation almost overnight. The Bank of England then issued one-pound and ten-shilling notes which have been the regular currency ever since. The gold sovereign must be quite rare even in the British Isles today.

It was said that visitors in almost every country took the precaution to buy currency of the country they were going to spend a holiday or do business in, but British people did not need to do that. They could cash down a sovereign anywhere and it was accepted with alacrity and without challenge.

The old British pound seems to be still a cut above other coins—St. Thomas Times-Journal.

Japan's Mistake

Scientists Miscalculated Possibilities Of Making The Atomic Bomb

Japanese scientists tried to learn how to use splitting uranium atoms to make a substitute for coal, after miscalculating the possibilities of making a bomb. Dr. Karl T. Compton, president of the Massachusetts Institute of Technology said. The scientist recently returned from Japan.

The Japanese who headed the atomic bomb project was Nishina, well known to American physicists and himself a competent investigator. He had a cyclotron which was the counterpart of one of the large cyclotrons of the University of California, where these high-energy machines were used to obtain some of the key information on the Allied bomb project. Nishina used his cyclotron in the same way.

His miscalculation was that the neutrons atomic particles which make and spread the chain reaction that is the atomic explosion, would not spread fast enough to make an efficient bomb—an easy mistake to make.

German Machinery

May Be Requisitioned By Britain For Repairs

Arrangements are being made under the Potsdam agreement to bring some German plants and machinery to Britain as reparations. Sir Stafford Cripps, chairman of the Board of Trade, told Commons.

Cripps said only plants and machinery not essential to German peacetime economy would be taken. "Is not this spoliation of the defeated enemy peoples depriving them of their means of livelihood, altogether contrary to all good Socialist principles?" Laborite H. H. Stokes asked. Cripps reiterated that no equipment would be taken that was essential to Germany's peace economy.

It takes six men a day and a half to clean the crystal chandeliers in the East Room at the White House, Washington.

To Maintain Peace

Relationships Between Canada And United States An Example To The World

The history of Canada and the United States exemplifies the relationship which must exist between the nations of the world if the peace is to be preserved. Hon. Paul Martin, Canada's secretary of state, said in an address to the Canadian Women's club in New York.

From the Rush-Bagot Treaty of 100 years ago—the world's first disarmament treaty—through the International Joint Commission to the Second Great War's Permanent Joint Board of Defence, Canadian-American relations have been a model of international collaboration for peace, Mr. Martin said.

But Canada has emerged from the Second Great War, not just as an interpreter of the United States to Britain but as a nation in her own right, the state secretary said, pointing to the proposed bill in the House of Commons for a Canadian citizenship act as evidence of the stature of nationhood felt by the Dominion. Canadian delegate to the 1938 assembly of the League of Nations, Mr. Martin said that if any lesson were learned from the history of the league and the subsequent war the league failed to halt, it was that power as exemplified by the United Nations must be given its place in the preservation of peace.

NEW CAMERA TUBE

Outdoor television at night or any time, as well as indoors under the poorest of lighting conditions now is possible, engineers of the Radio Corporation of America and the National Broadcasting Company said in New York as they demonstrated a new camera tube that can see at times better than the human eye.

TELLS ITS OWN STORY "It took the R.A.F. two years to win the battle of the Ruhr, and in doing it more lives were lost over Essen than over any other place. Now when you look down on the deadly stillness of the ruins, you realize that the R.A.F. did not make their sacrifice in vain."

Many of the Burmese people are Buddhists, and their religion occupies foremost part of their life.

LIFE'S LIKE THAT

WILL-YUM.

"I need more allowance, you need a new winter coat... what do you say we try collective bargaining on pop?"

REG'LAR FELLERS—A Nose For Business

Lady With The Lamp

UNIRA Is 20th Century's Idea Of Florence Nightingale

To the liberated nations of the world, UNIRA is a 20th century "lady with the lamp" who flies to the bedside of its patients, using weapons that were undreamed of in Florence Nightingale's day.

UNIRA lost no time when word of a typhoid fever epidemic in Albania was flashed to the outside world in August. Piloting the plane himself, Air Vice-Marshal Richard E. Saul, hero of the R.A.F. and second in command of UNIRA in the area, flew 30,000 doses of vaccine from Italy to Tirana, the Albanian capital.

When a cholera outbreak in China mushroomed to 20,000 cases in Chungking alone, UNIRA flew a "mercy team" of seven doctors and two engineers into China over the "hump." One case of vaccine had to be jetisoned over the Himalayas, but there was enough left to stop the epidemic. Six iron lungs were flown to France after a broadcast appeal by UNIRA in England brought 57 offers.

Coping with spot emergencies is only one part of the medical work of UNIRA, Dr. W. A. Sawyer, director of the health division, said. "Our three responsibilities are to control epidemics, to help local health authorities get back on their feet, and to provide medical and sanitary supplies where they are needed most urgently," he said. By the end of 1945 UNIRA hopes to deliver 9,000 tons of such supplies where they can do the most good.

So far we have had no big epidemics comparable to those of the last war, despite Europe's weakened condition, because we have better methods of fighting diseases and can distribute supplies more quickly," Dr. Sawyer said.

But, he warned, the crucial test will be the winter ahead, when the resistance of millions to cold and hunger will be at its lowest ebb.

Made Original Models

Woman Worked On Plans For "Mulberry," The Great Harbor

The woman who worked for nearly a year in a specially blacked out room under heavy security regulations, and who made the original cardboard scale models from which "Mulberry," the great pre-fabricated harbor, eventually grew, is Mrs. Masika Chouin, Lancaster, personal assistant to Col. V. C. Steer-Wobster, O.B.E. in charge of the Mulberry Mission to Canada. Mrs. Lancaster, whose husband, Major Pat Lancaster of the 3rd Hussars, was a prisoner of war in Java, was chosen after the Quebec Conference of 1943, to work on Mulberry because of her special art training. She was the only woman so honored.

In the actual operation of Mulberry from D-Day onwards, Mrs. Lancaster was in charge of the War Office Operations Room. She actually built the relief map of Mulberry on new work with the exhibition on the basis of signals to and from Normandy; and when her chief was over in France kept Churchill up to date on developments.

Many months later she was allowed to break her secret by showing the models to members of the Lords and Commons. Last spring she visited Paris to explain Mulberry to the women of France, and is now in Canada to do the same job for Canadian women.

By Fred Neher

THREE PRETTY CO-EDS in three pretty suits, Gloria Colliton, Joy Hardy and Bonnie Haviland show you how a CWAC, a WREN and a WD step out of uniform into civvies. It's all as simple as ripping off insignia, adding a dash of braid and a set of buttons. Designed by Martha, Canadian Fashion Creator, these reconverted servicewomen's uniforms retain the good fit and fine tailoring of the original uniform but flash the fashion of the "better" suits. Any discharges can follow these insignia herself just by tacking on a little braid and some new buttons.

Becoming Popular

People Are Liking Community Locker Plants For Frozen Foods

Complete "cold centres," serving entire communities or towns and offering services ranging from the storage of furs and blankets to the processing and storage of frozen foods, now are envisioned by leaders in the mechanical refrigeration industry. Their forecast is based on two factors. The first is the steady growth in popularity throughout the country of frozen food locker plants, now numbering more than 6,500. Second is the increase in the essential services performed by mechanical refrigeration, now past the 200-mark. To these is added the fact that improvements in refrigeration equipment, many of them stemming from war needs, make possible more efficient centralization of facilities—Brandon Sun.

Arctic Maneuvers

Planes And Vehicles Will Be Given A Severe Test

It will be chilly going for the Canadian troops who take part in the maneuvers in the Arctic regions this winter. Planes and vehicles will be given severe tests. How they stand up under the extreme cold will contribute to the general research. The Americans will be interested in these Arctic maneuvers. The military leaders in the United States want to be prepared to defend their country from all directions. They have no desire to be caught off base by a huge army descending from the region of the North Pole—W. L. Clark in Windsor Star.

More than 60 per cent. of Egypt's landowners derive their entire living from an acre or less of land.

OUR COMPLETE SHORT STORY—

HERRICK SAID IT

By GWEN CASH

Wheeler Newspaper Syndicate

This sailor ran into me as I came out of the apartment-hotel, where I live in one room with a turn-about bed, kitchenette and bath. Almost literally ran into me, I mean. Hanging onto his arm was a dark-eyed fluff of a girl, dressed in white with skirts a bit above her bare knees and the sort of hat a woman my age can't get away with but would like to, perched on a couple of curls. It was a Saturday morning in July. A morning that fairly quivered with sunshine. As I'd passed the florist shop in the hotel corridor, I'd smelt roses, sweet peas, magnolias and remembered, though it seemed so long ago, I'd once lived in a house with a garden. Had once had a real home—not just a turn-about bed. It was that sort of morning—nostalgic but full of promise at the same time.

The sailor grabbed me by the arm. "Can you give me the name of a really reliable parson?"

I smothered a laugh. His young, blue eyes were far too serious.

"Baptist, Methodist, United, Episcopal or Catholic?"

"It doesn't matter a bit just as long as it's tight and legal—and in a church. Senia here," he looked down protectively, "is Russian by descent."

"How about your papers? License and orders?"

"All in order," he said.

"When's it to be?"

"Today—please, I'm ashore till Monday. I've enough to—" then he looked embarrassed and changed what he'd begun to say into: "We'll have a hotel room tonight." I guessed he'd been going to say he had enough money for the week-end honeymoon but suddenly remembered I was a stranger. I guessed too, come Monday his Senia would be looking for a job.

I took them across the road to Neptune House, a sailor's canteen, where my war work was to hostess and generally make myself useful. We phoned here and there, but the entire city seemed bound to be either buried or wed on that particular Saturday. At last the ceremony was fixed for seven o'clock that evening at St. Stephen's, Episcopalian.

Then this sailor said, "Would you know anyone who'd be my best man?"

Of course I might have dug up some old dodo or other. But I figured if this boy had been married in peacetime, a school chum would have stood by him, so the least and best I could do was to get someone about his own age.

I cornered Jock over the phone. A freckle-faced, good-natured boy about eighteen. He'd been in the army, he agreed resignedly, when I explained what we wanted.

All this time the girl Senia had said hardly a word. Now she looked at me with dark eyes and asked, "Is there any place I could put on my stockings before my wedding?"

This, then, was to be the limit of her preparations for her wedding! To pull over her slender suntanned legs a pair of wartime stockings.

I offered my apartment. Suggested she might like to rest there this afternoon. But she shook her head. She'd be exploring the town with her sailor.

We met there that evening. I and this sailor and his Senia and Jock and the woman friend whom I'd had to phone to explain why we couldn't dine together as we'd planned.

Back at the apartment we drank good sherry I'd managed to dig up. Then this sailor and his Senia, looking like starry-eyed children, wandered out into the still and lovely summer night.

As the door closed after them, I caught sight of myself in the mirror opposite. Could my hair be as grey as all that? I'd not realized the terrifying network wrinkles had made about eyes that had once been called beautiful! No amount of lipstick could make that mouth desirable. Even the figure I'd always considered lissome looked lumpy to-night.

I thought of another night in July and of a war a quarter century ago. Then it was I, not Senia, a sailor had kissed beneath the summer stars; a sailor with gold on his uniform, but as young and handsome, with eyes as blue as those of the boy on whom the door had just closed.

Only for me there had been no quiet wedding evening among strings in a little corner church.

Instead there had been a family with wealth and a rigid sense of the fitness of things. A family with "your best interest at heart, my dear."

Now, Dora, you know it's impossible for Madam Desire to do a wedding gown at such short notice." (Senia had pulled on a pair of stockings and called it a day.)

"The man may be a fortune hunter, my dear. We know nothing of his people. Suppose, just suppose there should be—consequences, if you married him." (Senia's parents had best their daughter when she'd left, on her three-day uncomfortable journey by bus and train to join the man they had never seen. And I didn't doubt they'd welcome a grandchild.)

"The relations haven't met him." "Our friends don't know him."

"If you're so deeply in love you'll be willing to wait till the next time he's in port and we can have a proper wedding."

But his next port was on an uncharted sea—so there was no "proper wedding."

"Gather ye rose buds while ye may."

Old Time is still a-flying." Herrick said it two hundred and more years ago. Dorothy Dix couldn't give better advice.

Rosebud memories of a week-end honeymoon would be mighty precious treasure to a lonely woman with grey hair who lives in one room with a turn-about bed.

USED THEIR HEADS

American engineers engaged in constructing an air base on the island of St. Lucia built a bridge on the island. Called upon to span a stream at a point where it had a hairpin curve, they built the bridge, on land at the mouth of the curve, and then dammed off the water in the curve and forced it under their bridge.

SUBS IN PEACETIME

When submarines are operating in peacetime, a submarine warning flag is flown on their tenders, while the sub itself bears on one of its periscopes a small metal flag of the same design.

An average 2,000-horsepower aircraft engine undergoes 55,000 individual quality inspections during its manufacture.

WE'RE POINTING STRAIGHT AT YOU IF YOU WANT FAST RELIEF FROM A Cough-Cold

Here's what to do. Get a bottle of BUCKLEY'S MIXTURE. Take a few sips. Feel its instant effective action spread through throat, head and bronchial tubes. It starts at once to loosen up thick, choking phlegm, ease the cough, soothe the raw irritated membranes of throat and upper bronchial tract. Don't take chances—take BUCKLEY'S, Canada's largest selling cough and cold remedy. It's different—it's all medication—no syrup—acts faster—goes farther.

BUCKLEY'S MIXTURE

Democracy On March

But It Will Take Time To Educate Other Countries

When the great father of free China, Sun Yat-sen, loosed the revolution he calculated that it would take 40 years to complete. That would mean 1951 or 1952. When the Russian revolution was staged in 1917 Lenin and his associates agreed that the dictatorship for the proletariat would have to be maintained for at least 25 years. Let nobody be fooled. Complete freedom of speech, religion and expression, is coming in Russia. It is, I think, a reasonable bet that the peoples of that vast land will win all the four freedoms at least as soon as do all subjects of our own King, or as do the colored peoples of U.S.A.

Democracy is already on the march. It is a force as irresistible as gravity—for in the end no educated human beings will consent to be ruled either by hereditary tyrants, or by Fascist gangsters or imperialistic interlopers, however benevolent.—Elinore Philpot

FOUND NEST EGG

A total of \$30,000 Government bonds was the "nest-egg" the clerk in a local market found recently, when she opened a case of eggs delivered by a Twin Falls, Idaho, rancher. The owner, Theo. M. Gehlke, was not aware of the loss until he was notified by the issuing bank to which the bonds were returned by the clerk.

Being Put To Work

Japanese Soldiers Kept Busy Cleaning Streets In Canton

The Chinese are in charge of Canton, where old Cathay first experienced contact with western civilizations. They have not asked for help and they don't tolerate interference. There still are Japanese soldiers on the streets of Canton and they wear little white gauze masks. They need the masks because they're sweeping the streets.

An American soldier said he stood on a street corner with an aged Chinese who spoke excellent English, watching two Japanese assiduously removing traces left by a passing unit of Chinese cavalry.

The sergeant inquired if the sight pleased the old man. The ancient smiled, nodded and then answered: "However, it is written that in the fourth year of the great emperor Han Wu, Di the Chinese soldiers were mounted upon elephants."

Five species of sturgeon are found in Canadian waters.

MACDONALD'S

Canada's Standard Smoke

What's happening around Canada: The victim of a prank at the age of four, when a piece of string was placed in her ear, a Kirkland Lake lady, now 22, had it removed by a doctor after severe pain.

A C. Winder's barber shop has been closed up as the oldest business in North Battleford, Sask. The late owner started it in 1908. Little Florence Hennigar of Dawsonville, N.B., gathered a pullet's egg which has a clock dial design on its surface, exact in all detail. There was excitement and windows in the area had to be closed when a skunk found refuge under the grating on the sidewalk of the Walkwell Shoe Store in Gannock, Ont. Two soldiers in their cups tried to dislodge it; as the crowd gathered J. Butler was struck by a car, knocked down, and fun was had all round. Thomas H. Fuller died in Warwick County, Ont. in his 82nd year, lived his entire life on the farm he was born. Johnny McGurkie, three years, was fatally injured by a freight engine at Wayne, Alta., when he rushed on the tracks to save his puppy, which had wandered onto the right-of-way.

99 and still going strong. Both Mrs. Margaret McLean of North Kamloops, B.C., and Mrs. Salina Henry of Altonville, Ont., near Granby, Que., celebrated 95th birthdays, second last week in October.

It is wealth or doggone good citizenship. Tax payments for the record of \$7,955 as against last year's ordinary percentage of 97.891.

A plug for women from the Woodstock (N.B.) Sentinel Press: "Whatever else the war has brought to pass there can be no doubt of the increased fields which have opened to women generally. Women have assumed their responsibilities in wartime, but never have they assumed responsibilities so great as in recent years."

For the most noble sacrifice of all for the National Collection recently, a bouquet to Lions club of Simcoe, Ont., who at a luncheon devoted themselves of all their clothing except of course underwear and socks, and donated them for destitute Europeans. The Simcoe Reformer had a big picture of the courageous, if chilly, gentlemen, to prove that Simcoe goes one better than any other set of folk.

Each blind person in Amherstburg, Ont., will be presented with a Wonder Wheel, the new guide for blind people, invented by a former resident, Harry J. Deneau, now of Monterey Park, Calif. The Rotary club was asked to make the survey for distribution purposes. Said Mr. Deneau on a visit: "I am doing this for my mother to show her that her son has some thought for his old home town."

Is she proud? Mrs. Jack Lawrence of Red Deer, Alta., has word that her brother, Capt. Boris Zolotarev of Moscow has been decorated with the Order of the Hero of the Soviet Union, highest decoration in that country. Wounded four times, he has six decorations. All her four brothers served with the Russian army, as well as her sister.

INDIAN TROOPS

It can now be disclosed that 210,000 Indian troops were overseas at the end of the European war. They were in Italy, Africa and Iran where they guarded the supply route to Russia.

Europe stands at the crossroads of hope and despair and the only hope of the European people is faith in Britain, Canada and the United States. Gen. S. Mooney of Montreal, UNRRA's executive officer for Europe, said.

Hiding in England

1700 Deserters From Armed Services In Danger Of Arrest

The London Sunday Express said that more than 17,000 deserters and absentees from the armed services, including 240 Canadians, are hiding in Britain "in constant fear of arrest."

The article said remarkably few men have been "given away." They were reported to be spread widely through Britain, some in small villages. Provost reports show that most of the absentees are sheltered by women.

Authorities are asking how it is possible that such large numbers are able to escape arrest without identity cards, ration books or clothing coupons. Military police have been ordered to round up absentees, many of whom are said to be holding down civilian jobs.

ON A SHARP, COLD DAY—Warm yourself with big, generous helpings of a steamed pudding.

So simple to make, so satisfying to eat. If you haven't a quart mold, use a 1-pound coffee can or baking powder tins and cover with waxed paper held in place by rubber bands. For a first try, Steamed Fruit Pudding or Steamed Carrot Bran Pudding will reward your efforts.

Steamed Fruit Pudding

2 tablespoons butter or margarine
2 tablespoons sugar
1 egg, well-beaten
1/2 cup sifted flour

1 teaspoon soda
1/2 teaspoon salt
1/2 cup All-Bran
1 cup seedless raisins
1/2 cup seedless raisins

Blend butter and sugar thoroughly; add egg and beat well. Stir in raisins. Sift flour with soda and salt; mix with All-Bran. Add to first mixture alternately with boiling water. Stir in raisins and currants. Pour batter into greased 1-quart mold, cover tightly and steam about 1 1/2 hours. Serve with hard sauce or other pudding sauce. Yield: 6 servings.

Steamed Carrot Bran Pudding

2 eggs
1 cup sugar
1 cup grated raw carrots
1 cup milk
2 tablespoons melted shortening
1 cup All-Bran
1 cup fine dry bread crumbs
1/2 cup sifted flour

Beat eggs until light; add sugar and beat until fluffy. Add carrots, milk, shortening, All-Bran and bread crumbs which have been mixed with salt and spices. Add raisins, citron and orange peel. Mix well. Fill greased 1-quart mold or 1-pound coffee can three-fourths full, cover tightly and steam about three hours. Serve hot with hard sauce or other pudding sauce. Yield: 8 servings. Note—Pudding may be steamed in greased custard cups for about one hour.

CAUGHT AN INTRUDER

Joseph Darichuk, 23, was charged with housebreaking in Toronto after he was captured by 72-year-old Henry Cuthbert and his 74-year-old wife while rifling drawers in their house. Mrs. Cuthbert surprised the housebreaker who made a leap for the window. She caught him by the feet and with her husband, held him until police came.

Blowing is one of the most ancient and important of the methods in glass making.

Rev. Geo. A. Kettlys

(Continued from Page 1)
Rippon, Percy Dickieson and J. M. Allan. Honorary pallbearers were Robert Holmes, Charles MacQuarrie, William Antrobus and James Glendinning.

Interment took place in Coleman Union cemetery.

Rev. and Mrs. J. L. Wright, of Vulcan, attended the funeral, Mrs. Wright being a sister of Mrs. Kettlys.

APPRECIATION

The Journal
Coleman, Alberta.

Dear Sirs:

I take this opportunity of thanking you for the excellent work you did in assisting your town to go over the top so successfully in the Ninth Victory Loan. Without the active support of the newspapers, the wonderful results would have been impossible to obtain.

On behalf of the National War Finance Committee, we thank you very much for your efforts.

Yours very truly,
J. B. Cross,
Provincial Chairman,
Public Relations Section.

In Memoriam

FAIRFULL—In Loving Memory of our dear husband and father, Robert Fairfull, killed in McGillivray mine explosion, Nov. 23, 1926.

To memory ever dear.
Inserted by his widow and daughter, Calgary.

Christmas Seals form the only source of revenue of the Alberta Tuberculosis Association.

Two-thirds of all the deaths from tuberculosis occur before the age of 50.

Dr. Robert Koch, discoverer in 1882 of the tuberculosis germ, said that medical men should study, not the number of deaths from TB, but the spread of the disease among the living.
